

# Fire Engineering®

TRAINING THE FIRE SERVICE FOR 129 YEARS

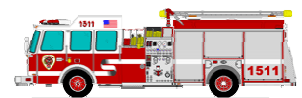

## Company Training Drill

| NFPA Objectives (JPR's)                                   | Job Levels  | Critical Safety Points  |
|---|---|---|
| <ul style="list-style-type: none"> <li>Various</li> </ul> | <ul style="list-style-type: none"> <li>All Members</li> </ul> | <ul style="list-style-type: none"> <li>Adherence/enforcement to policy</li> </ul> |

## Know Your Safety/Survival SOG's

Review your departments SOG's and define what your policy is for the operations listed below. Your knowledge and ability to apply these procedures is essential to your safety and survival. Many of these operations have an NFPA Standard reference and many departments have completed policies that can help you create and implement policies that do not exist in your department.

| Operation   | Department Procedure |
|---|----------------------|
| Department procedure for seat belt use on apparatus         |                      |
| Use of SCBA during fireground operations                    |                      |
| Speed that apparatus may use when responding to emergencies |                      |
| Procedure for approaching an intersection while responding  |                      |
| Procedure used for backing up apparatus                     |                      |
| Assignment of a standby rescue team during IDLH operations  |                      |
| Use and application of the Incident Management System       |                      |
| Accountability system used during operations                |                      |
| Procedures for incident rehabilitation                      |                      |
| Procedure for requesting additional resources               |                      |
| Procedure for requesting a MAYDAY                           |                      |

|                    |                                 |                       |
